-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference characters "187.1" and "15" have both been used to designate the connecting points. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.
2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "16.1" has been used to designate both the first threaded portion and the second threaded portion. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-2, 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Dauphin.

Dauphin shows a device (8,8',17) for adjusting a seat depth of a chair, comprising a seat carrier (8), an adjusting part (8') which is arranged pullable out on a front edge of the seat carrier, a spindle (20) rotatably supported in the adjusting part; two nuts (27) arranged on the spindle so that during a rotation of the spindle the nuts move on said spindle in opposite directions, and two braces (26) hingedly supported on the seat carrier and connected with the nuts. Connecting points (32) for the braces are arranged in a region of a perpendicular central in a seat direction of the carrier.

5. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Pringle (German Patent No. 19915327). Pringle shows a device (1,2,4,8a,8b) for adjusting a seat depth of a chair, comprising a seat carrier (1), an adjusting part (2) which is arranged pullable out on a front edge of the seat carrier, a spindle (3) rotatably supported in the adjusting part; two nuts (3g,3h) arranged on two different threaded portions (3a,3b) of the spindle so that during a rotation of the spindle the nuts move on said spindle in opposite directions, and two braces (4) hingedly supported on the seat carrier and connected with the nuts. Connecting points (See Fig.5) for the braces are arranged in a region of a perpendicular central in a seat direction of the carrier.

Allowable Subject Matter

6. Claims 6-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
